

# Raymundo Ramírez

Software Developer

## Profile

I am a highly motivated student pursuing a degree in Internet Technology Engineering, with a strong passion for web development, mobile application development, and databases.

I'm currently expanding my knowledge in machine learning and data science, and I'm eager to apply my skills in a professional environment where I can contribute, learn, and grow within a dynamic team. I'm proficient in a range of web development technologies and have a relentless drive to explore and master new areas in the ever-evolving tech industry.

## ★ Project

### Mobile app for appointment and medical records control

- The idea of the project was to facilitate contact between patients and doctors through an ionic app that facilitates the administration of appointments and patient records, and also generates doctor recommendations.
  - [Ionic-Typecript-Angular-Firebase](#)

### To-Do Web App

- This project consists of a to-do list, in which you can add, delete, and mark the tasks you have already done or want to do, it is programmed in JavaScript and is intended to be a web application, but being responsive it can be used from any smartphone.
  - [JavaScript](#)

### Contact List App

- this application is a contact address book, fully programmed in Kotlin in Android Studio, in this address book you can save a contact with a name and a numeric id, after saving it, you can search the contact using its name or id, you can also view all your contacts by pressing the "Ver Agenda"/"Phonebook" button.
